

Swanmatic Fixed Speed Capper

Model 49PC

The Swanmatic Model 49PC Capper is an efficient, maintenance-free benchtop capper for low to mid-production requirements.

The unit cycles at 43 strokes per minute at 60 Hz and 36 strokes per minute when the line frequency is 50 Hz (50 Hz motors are available upon request.)

It's dual voltage motor permits operation with either 120 or 240 VAC input.
